

President.

SENATOR LABEDZ: LB 253 is advanced. Next bill, Mr. Clerk.

CLERK: Madam President, LB 365 was a bill that was introduced by Senator Landis. (Title read.) The bill was introduced on January 20, referred to the Natural Resources Committee for hearing. The bill was advanced to General File. There are committee amendments pending by the Natural Resources Committee.

SENATOR SCHMIT: Mr. President and members, the committee amendments on LB 365 correct internal references in the bill. The bill itself reduces the number of tanks that will be covered under the Tank Inspection Program and the committee amendment identifies the word tank more specifically. Also includes in the statute, references to surface impoundments, pits, lagoons, ponds and describes what is called a flow through process tank. Also has a section on liquid traps or associate gathering lines directly related to oil and gas production. It is clarifying language throughout and I move the adoption of the amendment.

SENATOR LABEDZ: Thank you, Senator Schmit. There are no lights on for discussion on the committee amendments. Senator Schmit, do you have anything additional to say?

SENATOR SCHMIT: Nothing.

SENATOR LABEDZ: Thank you, Senator Schmit. We are voting on the committee amendments to LB 365. All those in favor vote aye, opposed nay. Have you all voted? Record, Mr. Clerk.

CLERK: 25 ayes, 0 nays on adoption of committee amendments, Madam President.

SENATOR LABEDZ: Do you have any further amendments?

CLERK: Senator, do you want to take up your amendment now? Madam President, Senator Landis would move to amend his bill. (Landis amendment appears on pages 776-77 of the Legislative Journal.)

SENATOR LABEDZ: Senator Landis.

SENATOR LANDIS: Madam Speaker, members of the Legislature, the amendment that I offer to the bill, I believe it's found in the Journal, and maybe it's not. If it's not, it was provided at
